SUBJECT INDEX

α-amino acids
Accumulation of proline and pattern of, in sugar beet plants in response to osmotic, water and salt stress 29
Absorption
foliare de l'aluminium: Ètude de la fixation et de la pénétration cuticulaire. 365
Accumulation
of proline and pattern of α-amino acids in sugar beet plants in response to osmotic, water and salt stress 29
accumulation, carbohydrate
and partitioning in rice; Interactions of CO_2 enrichment and temperature on 109
accuracy
of reference citations (or, the agony/ecstasy process—reader's choice!); My last on the 361
Acer pseudoplatanus L. (sycamore)
callus tissue of different origins; Variability of metal resistance in 293
acid-tolerant *Chlorella*
Regulation of heavy metal toxicity in,: Physiological and biochemical approaches 97
acidification
Physiological and biochemical responses of *Nostoc linckia* to combined effects of aluminum, fluoride and 1
activity, Genotoxic
of ozone in *Tradescantia* 45
activity, Rubisco
is altered in a starchless mutant of *Nicotiana sylvestris* grown in elevated carbon dioxide 385
air pollutants
Morphological and anatomical changes of Scots pine dwarf shoots induced by 185
Allelopathic potential
of *Echinacea angustifolia* D.C. 39
aluminium
Ètude de la fixation et de la pénétration cuticulaire; Absorption foliare de l'; 365
aluminum
Physiological and biochemical responses of *Nostoc linckia* to combined effects of fluoride, acidification and 1
amino acids, α-
Accumulation of proline and pattern of, in sugar beet plants in response to osmotic, water and salt stress 29
Anabaena sp.
Response of a rice field cyanobacterium, to physiological stressors 147
analysis, Microspore
for genotoxicity of a polluted environment 21
anatomical changes
Morphological and, of Scots pine dwarf shoots induced by air pollutants 185
anatomical characteristics
and ozone sensitivity of leaves of several herbaceous dicotyledonous plant species at Great Smoky Mountains National Park; Relationships between 413
apple orchard
Soil respiration in an 339
atmospheric CO_2 enrichment
Effects of, on chlorophyll and nitrogen concentrations of sour orange tree leaves 323
Aulosira fertilissima
Effects of UV radiation on the rice field cyanobacterium, ... 281
bitter melon seedlings, grafted
Photosynthetic responses of, to flood stress 167
boll, cotton (*Gossypium hirsutum* L.)
bract, and leaf; Effect of water stress on the epicuticular wax composition and ultrastructure of 61
bract, cotton (*Gossypium hirsutum* L.)
leaf and boll; Effect of water stress on the epicuticular wax composition and ultrastructure of 61
bracts, cotton
fruits, and leaves during ontogeny; Drought effects on the water relations of 51
buffalo grass
Effects of salt stress on root plasma membrane characteristics of salt-tolerant and salt-sensitive 239
Ca
K, Na, and Mg in epilithic and in decomposing detached thalli of the lichen *Ramalina maciformis* and its potential role in the cycling of these elements in the Negev Desert; Spatial and temporal changes in the concentration of 83

callus tissue
of different origins; Variability of metal resistance in *Acer pseudoplatanus* L. (sycamore) 293
carbohydrate
accumulation and partitioning in rice; Interactions of CO_2 enrichment and temperature on 109
carbohydrates
Do the lichens *Xanthoparmelia conspersa* (Ach.)Hale and *Rhizocarpon* Ram. em. Th. Fr. subgenus *Rhizocarpon* utilise, for radial growth? 13
carbohydrates, Non-structural
in *Deschampsia antarctica* Desv. from South Shetland Islands, maritime antarctic 393
carbon dioxide, elevated
Rubisco activity is altered in a starchless mutant of *Nicotiana sylvestris* grown in 385
cellular injury
, visible injury of leaves, and ozone exposure levels for several dicotyledonous plant species at Great Smokey Mountains National Park; Relationships between 299
Chlorella, acid-tolerant
Regulation of heavy metal toxicity in,: Physiological and biochemical approaches 97
chlorophyll
and nitrogen concentrations of sour orange tree leaves; Effects of atmospheric CO_2 enrichment on 323
citations, reference
My last on the accuracy of, (or, the agony/ecstasy process—reader's choice!) 361
climate change
Simulation of, with infrared heaters reduces the productivity of *Lolium perenne* L. in summer 271
CO_2 enrichment
and temperature on carbohydrate accumulation and partitioning in rice; Interactions of 109
CO_2 enrichment, atmospheric
Effects of, on chlorophyll and nitrogen concentrations of sour orange tree leaves 323
composition, epicuticular wax
Effect of water stress on the, and ultrastructure of cotton (*Gossypium hirsutum* L.) leaf, bract, and boll 61
concentration
of K, Na, Mg and Ca in epilithic and in decomposing detached thalli of the lichen *Ramalina maciformis* and its potential role in the cycling of these elements in the Negev Desert; Spatial and temporal changes in the 83
concentrations, Element
in the lichen *Hypogymnia physodes* (L.) Nyl. after 3 years of transplanting along Lake Michigan 255
conductance, hydraulic
Lateral root development and, in four populations of *Gutierrezia sarothrae* 157
Conger, Alan D. (obituary) 127
contamination, diesel fuel
in soil; Phytotoxicity observed in *Tradescantia* correlates with 313
corn
and soybean seedling emergence at low temperature; Application of Ga_3 and kinetin to improve 377
cotton
fruits, bracts, and leaves during ontogeny; Drought effects on the water relations of 51
cotton
Soil temperature derived prediction of root density in 303
cotton (*Gossypium hirsutum* L.)
leaf, bract, and boll; Effect of water stress on the epicuticular wax composition and ultrastructure of 61
cotton germplasm
Screening, for root growth potential 333
cyanobacterium
, *Aulosira fertilissima*; Effects of UV radiation on the rice field 281
cyanobacterium *Anabaena* sp.
Response of a, to physiological stressors 147
cycling, (nutrient)
Spatial and temporal changes in the concentration of K, Na, Mg and Ca in epilithic and in decomposing detached
thalli of the lichen *Ramalina maciformis* and its potential role in the cycling of these elements in the Negev Desert 83
decay, Fallout
simulation experiments with the stamen hairs of stable and mutable *Tradescantia* clones 173
Deschampsia antarctica Desv.
from South Shetland Islands, maritime antarctic; Non-structural carbohydrates in 393

Desert, Negev
Spatial and temporal changes in the concentration of K, Na, Mg and Ca in epilithic and in decomposing detached thalli of the lichen *Ramalina maciformis* and its potential role in the cycling of these elements in the 83
developing maize kernals
grown in culture; Effects of heat stress on enzyme activities and transcript levels in 199
development, Lateral root
and hydraulic conductance in four populations of *Gutierrezia sarothrae* 157
dicotyledonous plant species
at Great Smokey Mountains National Park; Relationships between cellular injury, visible injury of leaves, and ozone exposure levels for several 299
diesel fuel contamination
in soil; Phytotoxicity observed in *Tradescantia* correlates with 313
diurnal constancy
in photosystem II efficiency; Leaf solar tracking response exhibits 431
Drought effects
on the water relations of cotton fruits, bracts, and leaves during ontogeny 51
dwarf shoots, Scots pine
Morphological and anatomical changes of, induced by air pollutants 185
Echinacea angustifolia D.C.
Allelopathic potential of 39
Element concentrations
in the lichen *Hypogymnia physodes* (L.) Nyl. after 3 years of transplanting along Lake Michigan 255
environment, polluted
Microspore analysis for genotoxicity of a 21
enzyme activities
and transcript levels in developing maize kernals grown in culture; Effects of heat stress on 199
epicuticular wax composition
Effect of water stress on the, and ultrastructure of cotton (*Gossypium hirsutum* L.) leaf, bract, and boll 61
Fallout decay
simulation experiments with the stamen hairs of stable and mutable *Tradescantia* clones 173
flood stress
Photosynthetic responses of grafted bitter melon seedlings to 167
flooding and sediment deposition
Tolerance of four wetland plant species to 131
fluoride
Physiological and biochemical responses of *Nostoc linckia* to combined effects of aluminum, acidification and 1
foliare, Absorption
de l'aluminium: Étude de la fixation et de la pénétration cuticulaire. 365
fruits, cotton
bracts, and leaves during ontogeny; Drought effects on the water relations of 51
fumigation, open-field
in central Finland; Ozone-sensitivity of Scots pine and Norway spruce from northern and local origin to long-term 209
Ga_3 and kinetin,
Application of, to improve corn and soybean seedling emergence at low temperature 377
Genotoxic activity
of ozone in *Tradescantia* 45
genotoxicity
Microspore analysis for genotoxicity of a polluted environment 21
germination
of light-sensitive lettuce seeds; Effects of source of plant material and temperature on the production of smoke extracts that promote 421
germplasm, cotton
Screening, for root growth potential 333
Gossypium hirsutum L.
Effect of water stress on the epicuticular wax composition and ultrastructure of cotton ( ) leaf, bract, and boll 61
Gossypium hirsutum L.
leaves; Photon flux density *versus* leaf senescence in determining photosynthetic efficiency and capacity of 439
grafted bitter melon seedlings
Photosynthetic responses of, to flood stress 167

Great Smokey Mountains National Park
Relationships between cellular injury, visible injury of leaves, and ozone exposure levels for several dicotyledonous plant species at 299
Great Smoky Mountains National Park
Relationships between anatomical characteristics and ozone sensitivity of leaves of several herbaceous dicotyledonous plant species at 413
growth
and proline content of primary roots and on the ultrastructure of root caps; The influence of herbicides on the growth potential, root
Screening cotton germplasm for 333
growth, radial
Do the lichens *Xanthoparmelia conspersa* (Ach.)Hale and *Rhizocarpon* Ram. em. Th. Fr. subgenus *Rhizocarpon* utilise carbohydrates for, ? 13
Gutierrezia sarothrae
Lateral root development and hydraulic conductance in four populations of 157
hairs, stamen
of stable and mutable *Tradescantia* clones; Fallout decay simulation experiments with the 173
heat stress, Effects of
on enzyme activities and transcript levels in developing maize kernals grown in culture 199
heavy metal toxicity
Regulation of, in acid-tolerant *Chlorella*: Physiological and biochemical approaches 97
herbicides
The influence of, on the growth and proline content of primary roots and on the ultrastructure of root caps 71
Hesperus matronalis
Ultraviolet-B radiation screening effectiveness of reproductive organs in 447
high light intensities
Short-term effects of, on soybean nodule activity and photosynthesis 349
hydraulic conductance
Lateral root development and, in four populations of *Gutierrezia sarothrae* 157
Hypogymnia physodes (L.) Nyl.
Element concentrations in the lichen, after 3 years of transplanting along Lake Michigan 255
infrared heaters
Simulation of climate change with, reduces the productivity of *Lolium perenne* L. in summer 271
injury of leaves
, and ozone exposure levels for several dicotyledonous plant species at Great Smokey Mountains National Park; Relationships between cellular injury, ... 299
injury, cellular
, visible injury of leaves, and ozone exposure levels for several dicotyledonous plant species at Great Smokey Mountains National Park; Relationships between 299
Interactions
of CO_2 enrichment and temperature on carbohydrate accumulation and partitioning in rice 109
K
Na, Mg and Ca in epilithic and in decomposing detached thalli of the lichen *Ramalina maciformis* and its potential role in the cycling of these elements in the Negev Desert; Spatial and temporal changes in the concentration of 83
kinetin
Application of Ga_3 and, to improve corn and soybean seedling emergence at low temperature 377
Lake Michigan
Element concentrations in the lichen *Hypogymnia physodes* (L.) Nyl. after 3 years of transplanting along 255
Lateral root development
and hydraulic conductance in four populations of *Gutierrezia sarothrae* 157
Leaf
solar tracking response exhibits diurnal constancy in photosystem II efficiency 431
leaf senescence
Photon flux density *versus*, in determining photosynthetic efficiency and capacity of *Gossypium hirsutum* L. leaves. 439
leaf, cotton (*Gossypium hirsutum* L.)
bract, and boll; Effect of water stress on the epicuticular wax composition and ultrastructure of 61
leaves
Effects of atmospheric CO_2 enrichment on chlorophyll and nitrogen concentrations of sour orange tree 323

leaves
of several herbaceous dicotyledonous plant species at Great Smoky Mountains National Park; Relationships between anatomical characteristics and ozone sensitivity of 413
leaves, cotton
bracts, and fruits during ontogeny; Drought effects on the water relations of 51
leaves, *Gossypium hirsutum* L.
Photon flux density *versus* leaf senescence in determining photosynthetic efficiency and capacity of 439
leaves, injury of
, and ozone exposure levels for several dicotyledonous plant species at Great Smokey Mountains National Park; Relationships between cellular injury, ... 299
lettuce seeds, light-sensitive
Effects of source of plant material and temperature on the production of smoke extracts that promote germination of 421
lichen
Hypogymnia physodes (L.) Nyl. after 3 years of transplanting along Lake Michigan; Element concentrations in the 255
lichens
Xanthoparmelia conspersa (Ach.)Hale and *Rhizocarpon* Ram. em. Th. Fr. subgenus *Rhizocarpon* utilise carbohydrates for radial growth?; Do the 13
light intensities, high
Short-term effects of, on soybean nodule activity and photosynthesis 349
Lolium perenne L.
Simulation of climate change with infrared heaters reduces the productivity of, in summer 271
low temperature
Application of Ga_3 and kinetin to improve corn and soybean seedling emergence at 377
maize kernals, developing
grown in culture; Effects of heat stress on enzyme activities and transcript levels in 199
melon seedlings, grafted bitter
Photosynthetic responses of, to flood stress 167
metal resistance
Variability of, in *Acer pseudoplatanus* L. (sycamore) callus tissue of different origins 293
metal toxicity, heavy
Regulation of, in acid-tolerant *Chlorella*: Physiological and biochemical approaches 97
Mg
K, Na, and Ca in epilithic and in decomposing detached thalli of the lichen *Ramalina maciformis* and its potential role in the cycling of these elements in the Negev Desert; Spatial and temporal changes in the concentration of 83
Microspore
analysis for genotoxicity of a polluted environment 21
Morphological
and anatomical changes of Scots pine dwarf shoots induced by air pollutants 185
mutant, starchless
of *Nicotiana sylvestris* grown in elevated carbon dioxide; Rubisco activity is altered in a 385
Na
K, Mg and Ca in epilithic and in decomposing detached thalli of the lichen *Ramalina maciformis* and its potential role in the cycling of these elements in the Negev Desert; Spatial and temporal changes in the concentration of 83
Negev Desert
Spatial and temporal changes in the concentration of K, Na, Mg and Ca in epilithic and in decomposing detached thalli of the lichen *Ramalina maciformis* and its potential role in the cycling of these elements in the 83
Nickel
uptake and release in nickel-resistant and -sensitive strains of *Scenedesmus acutus F. alternans* (Chlorophyceae) 401
nickel-resistant and -sensitive
strains of *Scenedesmus acutus F. alternans* (Chlorophyceae); Nickel uptake and release in 401
Nicotiana sylvestris
grown in elevated carbon dioxide; Rubisco activity is altered in a starchless mutant of 385
nitrogen
Effects of atmospheric CO_2 enrichment on chlorophyll and, concentrations of sour orange tree leaves 323
nodule activity, soybean
Short-term effects of high light intensities on, and photosynthesis 349
Non-structural carbohydrates
in *Deschampsia antarctica* Desv. from South Shetland Islands, maritime antarctic 393

Norway spruce
from northern and local origin to long-term open-field fumigation in central Finland; Ozone-sensitivity of Scots pine and 209
Nostoc linckia
Physiological and biochemical responses of, to combined effects of aluminum, fluoride and acidification 1
Obituary, Alan D. Conger 127
ontogeny
Drought effects on the water relations of cotton fruits, bracts, and leaves during 51
open-field fumigation
in central Finland; Ozone-sensitivity of Scots pine and Norway spruce from northern and local origin to long-term 209
orange; sour
tree leaves; Effects of atmospheric CO_2 enrichment on chlorophyll and nitrogen concentrations of 323
orchard, apple
Soil respiration in an 339
osmotic stress
Accumulation of proline and pattern of α-amino acids in sugar beet plants in response to water, salt and 29
ozone
Genotoxic activity of, in *Tradescantia* 45
ozone exposure levels
for several dicotyledonous plant species at Great Smokey Mountains National Park; Relationships between cellular injury, visible injury of leaves, and 299
ozone sensitivity
of leaves of several herbaceous dicotyledonous plant species at Great Smoky Mountains National Park; Relationships between anatomical characteristics and 413
Ozone-sensitivity
of Scots pine and Norway spruce from northern and local origin to long-term open-field fumigation in central Finland 209
partitioning, carbohydrate
and accumulation in rice; Interactions of CO_2 enrichment and temperature on 109
pattern
of α-amino acids in sugar beet plants in response to osmotic, water and salt stress; Accumulation of proline and 29
Photon flux density
versus leaf senescence in determining photosynthetic efficiency and capacity of *Gossypium hirsutum* L. leaves 439
photosynthesis
Short-term effects of high light intensities on soybean nodule activity and, ... 349
Photosynthetic responses
of grafted bitter melon seedlings to flood stress 167
photosynthetic
efficiency and capacity of *Gossypium hirsutum* L. leaves.; Photon flux density *versus* leaf senescence in determining 439
photosystem II efficiency
Leaf solar tracking response exhibits diurnal constancy in 431
Physiological
and biochemical responses of *Nostoc linckia* to combined effects of aluminum, fluoride and acidification 1
physiological stressors
Response of a rice field cyanobacterium *Anabaena* sp. to 147
Phytotoxicity
observed in *Tradescantia* correlates with diesel fuel contamination in soil 313
pine, Scots
dwarf shoots; Morphological and anatomical changes of, induced by air pollutants 185
pine, Scots
and Norway spruce from northern and local origin to long-term open-field fumigation in central Finland; Ozone-sensitivity of 299
plasma membrane, root,
characteristics of salt-tolerant and salt-sensitive buffalo grass; Effects of salt stress on 239
pollutants, air
Morphological and anatomical changes of Scots pine dwarf shoots induced by 185
polluted environment
Microspore analysis for genotoxicity of a 21
populations
of *Gutierrezia sarothrae;* Lateral root development and hydraulic conductance in four 157

potential, Allelopathic
of *Echinacea angustifolia* D.C. 39
prediction
of root density in cotton; Soil temperature derived 303
primary roots
The influence of herbicides on the growth and proline content of, and on the ultrastructure of root caps 71
productivity
of *Lolium perenne* L. in summer; Simulation of climate change with infrared heaters reduces the 271
proline
Accumulation of, and pattern of α-amino acids in sugar beet plants in response to osmotic, water and salt stress 29
proline content
of primary roots and on the ultrastructure of root caps; The influence of herbicides on the growth and 71
radial growth
Do the lichens *Xanthoparmelia conspersa* (Ach.)Hale and *Rhizocarpon* Ram. em. Th. Fr. subgenus *Rhizocarpon* utilise carbohydrates for, ? 13
radiation screening, Ultraviolet-B
, effectiveness of reproductive organs in *Hesperus matronalis* 447
radiation, UV
Effects of, on the rice field cyanobacterium, *Aulosira fertilissima* 281
Ramalina maciformis
Spatial and temporal changes in the concentration of K, Na, Mg and Ca in epilithic and in decomposing detached thalli of the lichen, and its potential role in the cycling of these elements in the Negev Desert 83
